

How do I - List my Collection?

Everyone has a collection: CDs, MP3s, DVDs, books etc. At some point we need to organise it.

Map Explorer

Focus on a section of your map by selecting a branch in the Map Explorer. Show and hide it using .

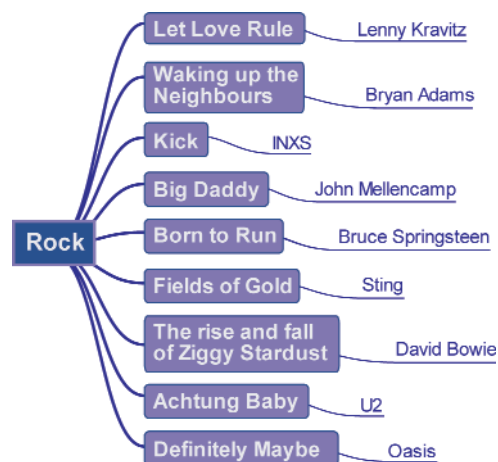

Enter the name of the collection at the centre of the map. The main headings will be the main categories for the collection, e.g. for Music this could be 'Rock', 'Pop', 'Classical'. Under these, list each album name and then under this the track names. Additional information can be added as sub-branches or as branch notes such as 'Artist', 'Year', 'Location', 'Extra Features' and so on.

Open Sample Maps

MindGenius comes with many useful sample maps. To view them select 'Samples' from the Help menu.

The beauty is, the information can be easily re-organised into your preferred format at any time, without having to start again!

The sample map 'CD Collection' shows a map of this type.
